Protective equipment and precautions for firefighters:

Wear a self-contained breathing apparatus and chemical protective clothing.

Cool endangered containers with water spray and, if possible, remove from danger zone. Additional information: Do not allow fire water to penetrate into surface or ground water.

6. Accidental release measures		
Personal precautions:	Keep away from sources of ignition - No smoking. Provide adequate ventilation. Wear appropriate protective equipment. Avoid contact with skin and eyes. Avoid breathing vapors. When vapors form, use respiratory protection.	
Environmental precaution	ns:	
	Do not allow to enter into ground-water, surface water or drains.	
Methods for clean-up:	Smaller amounts: Soak up with absorbent materials such as sand, siliceus earth, acid- or universal binder. Store in special closed containers and dispose of according to ordinance.	
	In case of greater quantities: Collect mechanically (use only explosion-proof equipment when pumping out).	
Additional information:	Use explosion-proof equipment and non-sparking tools/utensils.	

7. Handling and storage

Handling

Advices on safe handling: Provide adequate ventilation, and local exhaust as needed. Provide room air exhaust at ground level. Concentrated vapors are heavier than air. Precautions against fire and explosion:

Keep away from sources of ignition - No smoking.

Take precautionary measures against static discharges.

Concentrated vapors are heavier than air. Flammable mixtures may form in the air when product is heated above the flash point and/or during spraying. Use only explosion-proof equipment.

Storage

Requirements for storerooms and containers:

Keep only in the original container at temperature not exceeding 95 °F.

Keep container tightly closed. Protect from light.

Because oxygen (air) is necessary to stabilize product, fill container only to 90% of capacity.

Provide adequate oxygen (air) circulation for large containers to ensure product stability.

Do not store together with organic peroxides, ammonia or persulphates. Hints on joint storage:
